CLEANING HEATING AND COOLING SYSTEMS - QUICKER WITH SANOL EXPRESS

swiss made 

Ready to use

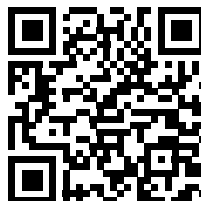

Sanol express for system capacities of 50 - 400 l

Sanol express for system capacities of 300 - 700 l

Sanol express, the portable cartridge filled with Sanol H-15 green. Makes cleaning the heating system a breeze. Sanol H-15 green has been tried and trusted for decades as a dispersant for heating and cooling systems. It has a pH value of 10.5, is classified as non-toxic and is therefore environmentally responsible. Heating system installers recommend reliable, inexpensive and straightforward heating system flushing with the Sanol express cartridge and Sanol H-15 green cleaning concentrate. The cost effective alternative to internal pipe rehabilitation or even the installation of a new heating system. It needs to be left for at least 7 days to take effect. Refill it again and again with Sanol H-15 green! Re-use it!
